Relent Software Technologies, is a fast growing software company with highly skilled software experts, focused mainly on varied software products that can be customized as per clients requirements.

Core Modules

Relent E-School is a School Management Application Software, which is unbeatable and comprehensive School Software that covers each and every aspect of school. It is an interactive platform for all the entities of a school like Teachers, Management, Finance Department, Students and Parents. Relent E-School, School Management software provides good interaction between parents and teachers. Parents can check student's status, exam result, communication with the class teacher etc. Administration staff can manage easy fee collection, attendance management, transportation etc.

Examination & Evaluation

The **Examination Management** module is a crucial part of E-School. Schools can set up their own marking system, activities and assign optional subjects as required. It is a user-friendly solution for converting marks into Grades according to Board (CBSE, State) Guidelines and generate Report Cards (including **CCE pattern**).

Admission management

Admission Management Module handles the entire Admission Process of Students. It helps educational institutions manage enquiry forms, application forms, student registration and admission approval. These activities are resource intensive and time consuming - hence the perfect place to begin with automation. Right from the enquiry to assignment of the right class and section to the newly admitted students, promoting & shuffling the existing students. This module allows efficient management of the entire admission process.

Library Management

Library Management Module automates the school's library allowing it to manage departmental libraries, store resource details including books, journals & multimedia resources for easy retrieval later and enable search and reservation management including issue, return, reservations, renewal etc.

Transport Management

Transport Management module provides a fully automated system for managing the routes of hundreds of students travelling in their school buses daily. It provides information **about** Bus availability at a desired destination; manages new requests for transport, manages inventory of School buses and takes care of Route Planning ,Bus interchange, Bus fee collection, Bus fee due reports etc.

Fee Collection

This is the heart function that has the undivided attention of the school management and parents. Thus, making this process error free and effortless was high on our priority lists. This module has been designed to incorporate the basic elements. This module automates fee processing, reminders, **fee collection and reporting**. It allows the management to track different receipts and miscellaneous collections. Periodic reports generated by this module are accessed by the management in their login itself from any where.

HR Management

This Module helps in coordinating all HR functions of schools. It helps managing information data, attendance, manpower recruitment, PF & ESI deductions, Time table etc. Login ID's are made available for each individual to perform their duties like mark entering, attendance marking, Tutorials, Clubs etc.

Accounts Management

Accounts Management module helps educational institutions to manage moneterial data. It helps manage ledger entries & vouchers, prepare P&L, Balance Sheets and Cash Flow statements through an easy and simple interface. It also provides Dual Accounts facility for institutes which manage multiple accounts by separating transactions.

Highlights

- ✔ Data are stored and managed centrally in systematic way without duplication
- ✔ 100% Web Based
- ✔ Free Data Entry Service
- ✔ 100% Customizable Software
- ✔ Unlimited Users & Logins

- ✔ 24X7 data availability
- ✔ Responsive template
- ✔ Multiple MIS reports
- ✔ Quick reports
- ✔ Complete Electronic data
- ✔ Userguide & Video Tutorial.

RELENT
Software Technologies

Complete E-School

Computerize your whole aspects

Automating office procedures can help avoid the unnecessary bureaucracy and drain on resources. Intelligent Form software, deployed across the company intranet or even over the Internet, can help reduce paper usage and time wasting as it cuts down on forms being incorrectly filed in or being lost.

Why Us ?

- EASY TO IMPLEMENT
- CONTINUOUS R & D TO UPGRADE THE PRODUCT
- A LONG LIST OF SATISFIED CLIENTS
- GUARANTEED CUSTOMIZATION
- FULL UTILIZATION OF RESOURCES
- TRULY MODULE BASED ERP
- AFTER SALES SUPPORTS THROUGH : TELEPHONIC, ONLINE (REMOTE DESKTOP),ONSITE
- CORE COMPETENCY (INSTITUTIONAL MANAGEMENT SOFTWARE)
- OVER 80,000 MAN HOURS HAS BEEN INVESTED IN THIS PRODUCT
- LATEST TECHNOLOGIES
